

# KEEP IT SIMPLE

Get the flexibility and control  
your business needs with our  
business mobile plans

### We know what your business needs when it comes to a good mobile plan

**Flexibility and range:** a mobile plan that meets the changing needs of your business.

**Network reliability:** a strong connection wherever you're working.

**Security:** protecting your data, devices and customers

**Efficiency:** You'll always know what you're using. Quick and responsive to give you greater control.

**Easy management:** simple to upgrade or make changes.

### Our new plans have it all

We have a variety of plans to fit, whatever your business looks like. But they all come with these as standard:

- 5G-ready
- Optional unlimited voice
- Roam like home at no extra cost in our Europe Zone (and a daily fee in more than 60 other countries)
- Variety of security options to choose the perfect solution
- Bill Protector – which helps control your spending
- Mobile Manager portal (to review usage and bills easily)

### Four new plans on one great network

Choose the plan that suits your business best:

**The Team Plan** – a shared data pot that automatically flexes and grows with your business.

**The Individual Plan** – dedicated data allowances to meet each person's individual needs.

**The Shared Plan** – a fixed, central pot of shared data for everybody to use.

**Custom Caller** – pay-per-minute voice plan if you only want to pay for what you use with the data plan that suits your business needs.

### Simple scalability with The Team Plan

**Scalable:** if you take on more people, you get more data for the pot.

**Efficient:** every three months, we automatically adjust your data allocation based on your average use that quarter. So you never buy more than you need and always have enough.

### Ringfenced data with The Individual Plan

**Help avoid surprise bills:** with a range of spend caps that alert your people when they're getting close to their limit - minimising the chance of overspending.

### Control and consistency with The Shared Plan

**Efficient:** a central pot of shared data for everybody to use meaning a reduced chance of overage charges as your heavy users change month to month.

### Why EE?

We're proud to be the UK's best 4G and 5G network. We were the first to launch 5G in the UK and have 5G in more places than any other network. Bringing incredible connectivity and speed to our customers before anyone else.

### THANK YOU
