

KEEP IT SIMPLE

Our business mobile plans offer
the security, flexibility and
control your business needs

We know what your business needs when it comes to a good mobile plan

Flexibility and range. Plans that adapt to your changing business needs.

Network reliability. A strong connection wherever you're working.

Transparency. Always know how much data you're using.

Easy management. Simple to upgrade or make changes.

Protection you can count on. Our business plans offer both device and data security as standard.

Our new plans have it all

We have a variety of plans to fit, whatever your business looks like. And they all come with these as standard:

- 5G-ready
- Optional unlimited voice
- Inclusive device security
- Make and take calls and SMS messages from the UK to over 60 countries for a daily fee
- Avoid unexpected bills and control your spending by setting alerts and data caps
- Save your data by connecting to five million WiFi hotspots nationwide, including the London Underground.

Three plans on one great network

Choose the plan that suits your business best:

The Individual Plan – dedicated data allowances to meet each person's individual needs.

The Shared Plan – a fixed, central pot of shared data for everybody to use.

The Team Plan – a shared data pot that automatically flexes and grows with your business.

Ringfenced data with The Individual Plan

Avoid surprise bills. A range of spend caps and alerts can help your people see when they're close to their limit so they don't over-spend.

Control and consistency with The Shared Plan

Easy efficiency. A central shared data pot means there's less chance of being overcharged as your heavy users may change from month to month.

Simple scalability with The Team Plan

Scalable. If you take on more people, you get more data for the pot.

Efficient. Every three months, we automatically adjust your data allocation based on your average use that quarter. So you never buy more than you need and always have enough.

Why EE?

We're proud to be the UK's best network 10 years running. We offer you fast, dependable connectivity. And we're so reliable that the UK's emergency services depend on us.
